

Projected global
population
up to
10 billion by 2050

Traditional farming
methods in nutrient
management can't
keep up with the
growing demands
of the increasing
population

Project Background

1:1 Ratio

Fertiliser AB
Dispensing

Response under

22 sec

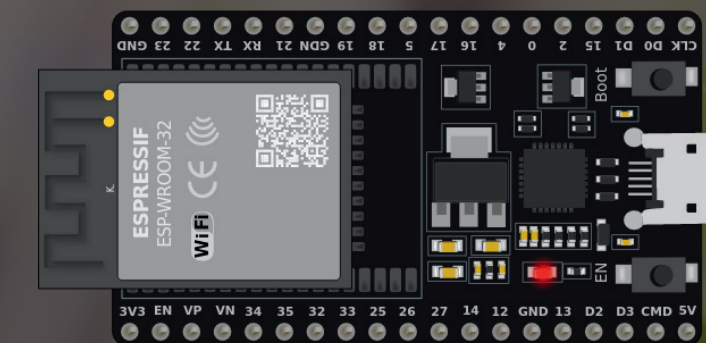

For every 1L

Wi-Fi and Bluetooth ready

ARDUINO
Based Code

ESP32 Microcontroller

Designed For NFT
Hydroponic Farm

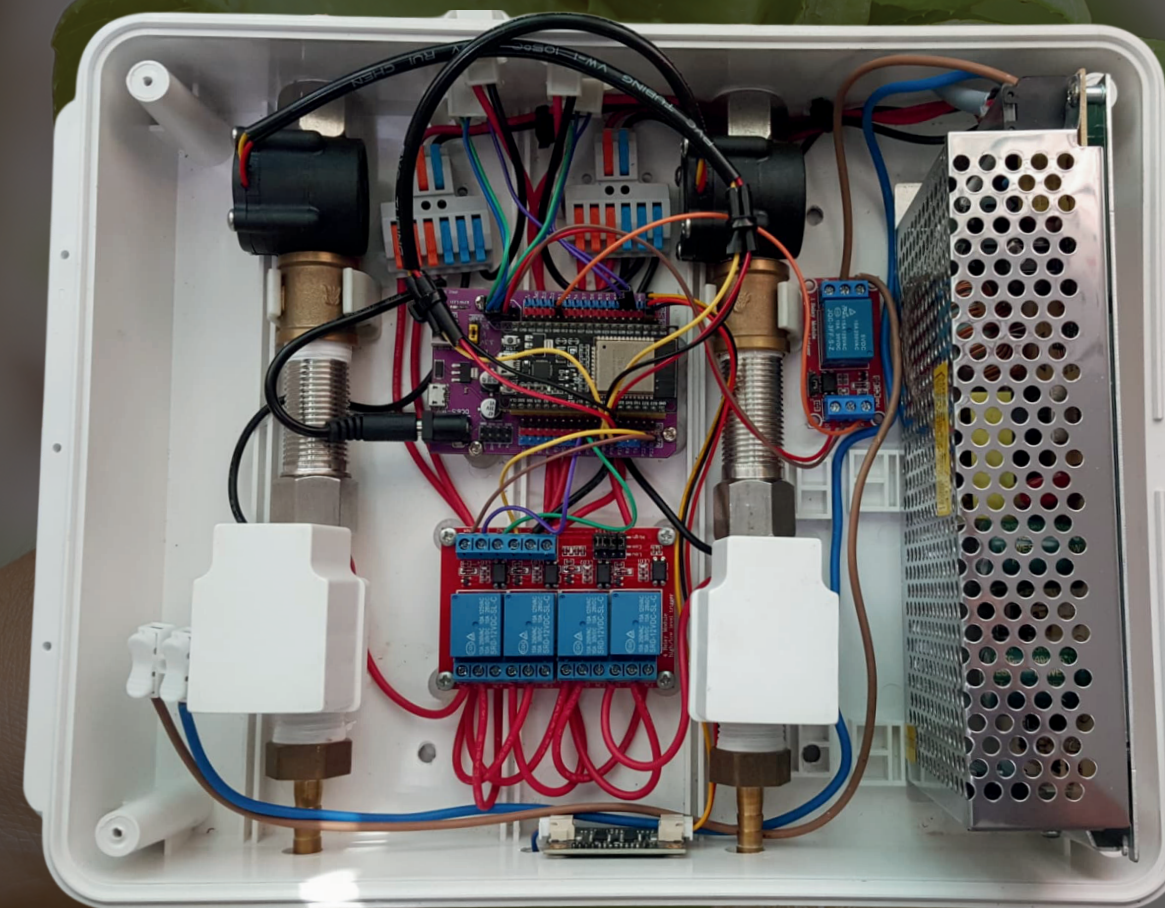

Internet of
Things

Modularity

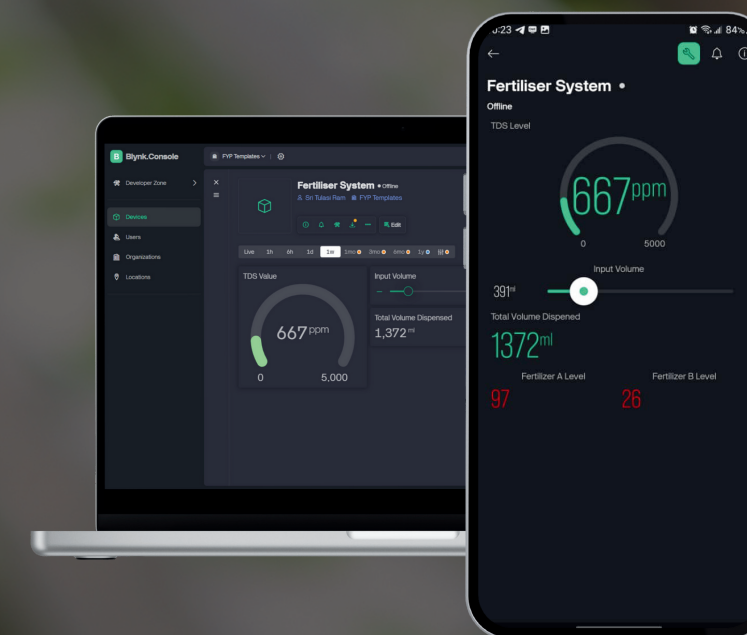

Fertiliser AB
Detection

Hydra

Hydroponic Yield Driven Real-time Automation

All-in-one fertiliser mixing system for Hydroponic Farming

User End Experience

Available on the
App Store

GET IT ON
Google Play

TDS Sensor
Range Up to

1,000 ppm

TDS Sensor
Accuracy

99.60%

Flow Sensor
Accuracy

97.54%

Achieving Nutrient
Concentration
Target up to

96%
